Transmission

Substations

Renewables

Telecommunications

Distribution

Foundations

Outdoor Lighting

EXPERIENCE AND EXPERTISE DRIVE OUR ABILITY TO GO FURTHER FOR CLIENTS.

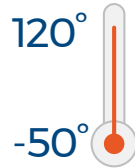

For 70 years we've served clients that are IOUs, independent developers, municipalities, and cooperatives.

We've installed nearly **200,000 miles** of power lines.

We've worked in **43 states** and **8 countries.**

Our crews have worked in extreme conditions. From mountains to swamps—and in temperatures that span from negative 50 degrees to 120 degrees Fahrenheit.

Irby was **first in the field** to employ helicopters for transmission construction.

We were also first to construct a 765kV project in the U.S. We ultimately built over **90% of America's total 765kV grid.**

OUR CLIENTS TRUST IN OUR TRAINED ABILITY TO WORK SAFELY AND DELIVER QUALITY WORK ON TIME.

Today, we have **800 employees** and a fleet of **2500 pieces**

of equipment ready to mobilize and serve your project or in the event of an emergency.

To maintain our base of talented and qualified personnel, we have developed an apprenticeship program together with Texas A&M University.

Providing and Maintaining a safe working environment is at the core of everything we do at Irby Construction.
