

KENTUCKY UTILITIES 345KV OHIO RIVER CROSSING

PROJECT TYPE

Transmission

SCOPE

2.42 Miles of 345kV, (2) 420ft lattice towers

LOCATION

Bedford, KY

CLIENT

Kentucky Utilities

START DATE

August 2008

COMPLETION DATE

December 2008

Irby Construction Company and Can-Fer Utilities completed the Trimble County - PSI Ohio River Crossing job for Kentucky Utilities in 2009. This project consisted of 2.42 miles of 345kV double circuit line including the installation of two (2) 420 ft. river crossing lattice towers.

Irby lead the project management with structure and wire installation. Can-Fer was utilized as a subcontractor on this project for the pier foundations (other than the river crossing towers). The foundations for the river crossing towers were installed by a third party subcontractor contracted by the owner.
